GATE 2027 CS/IT
MASTER INDEX & 100% PYQ COVERAGE AUDIT

13 Subject Books + General Aptitude - Every question of every supplied paper - Edition 3

Answer to "did you include every question?" - YES, now verified.
Edition 3 adds the six 2014-2015 papers you uploaded and a **COMPLETE QUESTION BANK** appendix to every book. Across the 14 books it now contains **all 1,495 questions** from the 23 supplied GATE CS papers (2014-2026): **1,265 CS + 230 GA**. Each entry gives the full statement, all four options (or NAT), year / set / marks / type, official answer key and the source page. Nothing is skipped - a question appears in exactly one book, and every book shows a per-year count so you can verify completeness yourself. The teaching sections (theory, worked PYQs, practice, formula sheets) stay curated.

DELIVERABLE INVENTORY - 15 PDFs + 2 DATA FILES

#	File	Subject / content	Qs in appendix	Pages
01	01_Programming_and_Data_Structures.pdf	Programming & Data Structures	174	32
02	02_Algorithms.pdf	Algorithms	93	21
03	03_Discrete_Mathematics.pdf	Discrete Mathematics	134	25
04	04_Engineering_Mathematics_Linear_Algebra.pdf	EM - Linear Algebra	44	13
05	05_Engineering_Mathematics_Probability_and_Statistics.pdf	EM - Probability & Statistics	41	13
06	06_Engineering_Mathematics_Calculus.pdf	EM - Calculus	26	11
07	07_Digital_Logic.pdf	Digital Logic	93	17
08	08_Computer_Organization_and_Architecture.pdf	Computer Organization & Architecture	149	24
09	09_Operating_Systems.pdf	Operating Systems	110	21
10	10_Theory_of_Computation.pdf	Theory of Computation	117	22
11	11_Computer_Networks.pdf	Computer Networks	126	22
12	12_Databases_(DBMS).pdf	Databases (DBMS)	98	21
13	13_Compiler_Design.pdf	Compiler Design	56	14
14	14_General_Aptitude_GATE_2027.pdf	General Aptitude (4 official sections)	230	40
-	(see audit CSV)	Out-of-syllabus topics from 2014/15 (Software Engineering)	4	-
-	00_MASTER_INDEX_GATE_2027.pdf	This file	-	2
-	00_EXHAUSTIVE_PYQ_Inventory.csv	All 1,495 questions, machine-readable	1495	-
-	00_COVERAGE_AUDIT.txt	Per-paper and per-subject reconciliation	-	-

COMPLETENESS PROOF - QUESTIONS PER PAPER (65 EACH)

Paper	Year	Set	Qs in book set	Text unrecoverable	Status
2014_Set-1	2014	Set-1	65	0	COMPLETE
2014_Set-2	2014	Set-2	65	0	COMPLETE
2014_Set-3	2014	Set-3	65	0	COMPLETE
2015_Set-1	2015	Set-1	65	0	COMPLETE
2015_Set-2	2015	Set-2	65	0	COMPLETE
2015_Set-3	2015	Set-3	65	0	COMPLETE
2016_Set-1	2016	Set-1	65	0	COMPLETE
2016_Set-2	2016	Set-2	65	0	COMPLETE
2017_Set-1	2017	Set-1	65	0	COMPLETE
2017_Set-2	2017	Set-2	65	0	COMPLETE
2018	2018	Single	65	0	COMPLETE
2019	2019	Single	65	0	COMPLETE
2020	2020	Single	65	0	COMPLETE
2021_Set-1	2021	Set-1	65	0	COMPLETE
2021_Set-2	2021	Set-2	65	0	COMPLETE
2022	2022	Single	65	0	COMPLETE
2023	2023	Single	65	0	COMPLETE

2024_Set-1	2024	Set-1	65	0	COMPLETE
2024_Set-2	2024	Set-2	65	0	COMPLETE
2025_Set-1	2025	Set-1	65	0	COMPLETE
2025_Set-2	2025	Set-2	65	0	COMPLETE
2026_Set-1	2026	Set-1	65	0	COMPLETE
2026_Set-2	2026	Set-2	65	0	COMPLETE
TOTAL			1495	0	

23 papers x 65 questions = **1,495**. The book set contains **1,495** entries - **every single stem is present**, so nothing is silently dropped. Five stems the OCR had dropped (2015 Set-1 Q24 and Q30, 2015 Set-2 Q7 and Q14, 2021 Set-2 Q28) were transcribed from the page images and are flagged as recovered in the CSV. 2015, 2017 and 2020 papers are image-only: their text was recovered with OCR, repaired, and flagged in every affected entry so you know to cross-check symbols against the original scan.

SUBJECT DISTRIBUTION IN THE SUPPLIED PAPERS

Counts below come from classifying all 1,265 CS questions and 230 GA questions by syllabus keywords, with a manual pass over every question the keywords could not resolve. Use this as a sanity check on where marks actually come from in the 2014-2026 papers, not as an official weightage table.

Book	Questions	Share of CS	1-mark	2-mark	MCQ	MSQ	NAT
Programming & Data Structures	174	13.8%	79	95	96	13	65
Algorithms	93	7.4%	45	48	59	10	24
Discrete Mathematics	134	10.6%	55	79	62	21	51
EM - Linear Algebra	44	3.5%	26	18	19	6	19
EM - Probability & Statistics	41	3.2%	18	23	10	2	29
EM - Calculus	26	2.1%	16	10	13	2	11
Digital Logic	93	7.4%	47	46	52	14	27
Computer Organization & Architecture	149	11.8%	53	96	48	11	90
Operating Systems	110	8.7%	40	70	41	22	47
Theory of Computation	117	9.2%	54	63	77	20	20
Computer Networks	126	10.0%	62	64	70	18	38
Databases (DBMS)	98	7.7%	42	56	60	15	23
Compiler Design	56	4.4%	29	27	40	6	10
General Aptitude (4 official sections)	230	100.0%	115	115	222	0	8
Other (2014/15 topics no longer in the GATE 2027 syllabus)	4	-	4	0	4	0	0

HOW TO USE THIS SET

- **Phase 1 (Weeks 1-6):** PDS -> Algorithms -> Discrete Maths. Solve each book's worked PYQs first, then its COMPLETE QUESTION BANK appendix paper-by-paper (keep a 3-hour clock for one full paper).
- **Phase 2 (Weeks 7-12):** OS -> DBMS -> TOC -> CN. One theory day, one PYQ day; use the appendix as a closed-book test and the answer key column to score instantly.
- **Phase 3 (Weeks 13-18):** Linear Algebra -> Probability/Stats -> Calculus -> Digital Logic -> COA -> Compiler Design.
- **Phase 4 (Weeks 19-24):** All 23 papers as full 65-question mocks using the appendices across books; revise the formula and rapid-revision pages only.
- **General Aptitude:** 10 questions (5x1 + 5x2 = 15 marks) every day - the GA book's appendix holds all 230 GA questions with answers.

Known limitations, stated plainly: (1) Figures, tables and circuit diagrams are not redrawn - each affected question says so and points to the source page. (2) 2015, 2017 and 2020 are image-only scans; their text was OCR-recovered and flagged, so verify unusual symbols. (3) Papers before 2014 are not in the supplied repository and are therefore absent - send them and they can be added the same way. (4) Subject tagging is keyword-based with a manual pass; if a question sits in a neighbouring book, it is still present exactly once across the set (audit CSV has the full mapping).
