GATE 2027 CS/IT
MASTER INDEX & 100% PYQ COVERAGE AUDIT

13 Subject Books + General Aptitude - Every question of every supplied paper - Edition 2

Answer to "did you include every question?" - YES, now verified.
Edition 2 adds a **COMPLETE QUESTION BANK** appendix to every book. Across the 14 books this appendix now contains **all 1,105 questions** from the 17 supplied GATE CS papers (2016-2026): **935 CS + 170 GA**. Each entry gives the full statement, all four options (or NAT), year / set / marks / type, official answer key and the source page. Nothing is skipped - a question appears in exactly one book, and every book shows a per-year count so you can verify completeness yourself. The teaching sections (theory, worked PYQs, practice, formula sheets) stay curated.

DELIVERABLE INVENTORY - 15 PDFs + 2 DATA FILES

#	File	Subject / content	Qs in appendix	Pages
01	01_Programming_and_Data_Structures.pdf	Programming & Data Structures	132	27
02	02_Algorithms.pdf	Algorithms	68	19
03	03_Discrete_Mathematics.pdf	Discrete Mathematics	98	22
04	04_Engineering_Mathematics_Linear_Algebra.pdf	EM - Linear Algebra	31	12
05	05_Engineering_Mathematics_Probability_and_Statistics.pdf	EM - Probability & Statistics	31	12
06	06_Engineering_Mathematics_Calculus.pdf	EM - Calculus	14	10
07	07_Digital_Logic.pdf	Digital Logic	70	15
08	08_Computer_Organization_and_Architecture.pdf	Computer Organization & Architecture	109	20
09	09_Operating_Systems.pdf	Operating Systems	82	18
10	10_Theory_of_Computation.pdf	Theory of Computation	98	20
11	11_Computer_Networks.pdf	Computer Networks	89	19
12	12_Databases_(DBMS).pdf	Databases (DBMS)	71	18
13	13_Compiler_Design.pdf	Compiler Design	42	13
14	14_General_Aptitude_GATE_2027.pdf	General Aptitude (4 official sections)	170	32
-	00_MASTER_INDEX_GATE_2027.pdf	This file	-	2
-	00_EXHAUSTIVE_PYQ_Inventory.csv	All 1,105 questions, machine-readable	1105	-
-	00_COVERAGE_AUDIT.txt	Per-paper and per-subject reconciliation	-	-

COMPLETENESS PROOF - QUESTIONS PER PAPER (65 EACH)

Paper	Year	Set	Qs in book set	Text unrecoverable	Status
2016_Set-1	2016	Set-1	65	0	COMPLETE
2016_Set-2	2016	Set-2	65	0	COMPLETE
2017_Set-1	2017	Set-1	65	0	COMPLETE
2017_Set-2	2017	Set-2	65	0	COMPLETE
2018	2018	Single	65	0	COMPLETE
2019	2019	Single	65	0	COMPLETE
2020	2020	Single	65	0	COMPLETE
2021_Set-1	2021	Set-1	65	0	COMPLETE
2021_Set-2	2021	Set-2	65	1	COMPLETE (1 scanned stem)
2022	2022	Single	65	0	COMPLETE
2023	2023	Single	65	0	COMPLETE
2024_Set-1	2024	Set-1	65	0	COMPLETE
2024_Set-2	2024	Set-2	65	0	COMPLETE
2025_Set-1	2025	Set-1	65	0	COMPLETE
2025_Set-2	2025	Set-2	65	0	COMPLETE
2026_Set-1	2026	Set-1	65	0	COMPLETE
2026_Set-2	2026	Set-2	65	0	COMPLETE
TOTAL			1105	1	

17 papers x 65 questions = **1,105**. The book set contains **1,105** entries. Of these, exactly **1** stem (2021 Set-2, Q47) could not be recovered from the supplied scan and is explicitly marked inside the OS book together with its official answer key - it is not silently dropped. 2017 and 2020 papers are image-only: their text was recovered with OCR, repaired, and flagged in every affected entry so you know to cross-check symbols against the original scan.

SUBJECT DISTRIBUTION IN THE SUPPLIED PAPERS

Counts below come from classifying all 935 CS questions and 170 GA questions by syllabus keywords, with a manual pass over every question the keywords could not resolve. Use this as a sanity check on where marks actually come from in 2016-2026 papers, not as an official weightage table.

Book	Questions	Share of CS	1-mark	2-mark	MCQ	MSQ	NAT
Programming & Data Structures	132	14.1%	62	70	65	13	54
Algorithms	68	7.3%	34	34	43	9	16
Discrete Mathematics	98	10.5%	40	58	38	22	38
EM - Linear Algebra	31	3.3%	16	15	13	6	12
EM - Probability & Statistics	31	3.3%	13	18	8	2	21
EM - Calculus	14	1.5%	12	2	5	2	7
Digital Logic	70	7.5%	38	32	37	14	19
Computer Organization & Architecture	109	11.7%	37	72	34	11	64
Operating Systems	82	8.8%	29	53	28	22	32
Theory of Computation	98	10.5%	44	54	61	20	17
Computer Networks	89	9.5%	43	46	43	18	28
Databases (DBMS)	71	7.6%	31	40	38	15	18
Compiler Design	42	4.5%	21	21	28	6	8
General Aptitude (4 official sections)	170	100.0%	85	85	170	0	0

HOW TO USE THIS SET

- **Phase 1 (Weeks 1-6):** PDS -> Algorithms -> Discrete Maths. Solve each book's worked PYQs first, then its COMPLETE QUESTION BANK appendix paper-by-paper (keep a 3-hour clock for one full paper).
- **Phase 2 (Weeks 7-12):** OS -> DBMS -> TOC -> CN. One theory day, one PYQ day; use the appendix as a closed-book test and the answer key column to score instantly.
- **Phase 3 (Weeks 13-18):** Linear Algebra -> Probability/Stats -> Calculus -> Digital Logic -> COA -> Compiler Design.
- **Phase 4 (Weeks 19-24):** All 17 papers as full 65-question mocks using the appendices across books; revise the formula and rapid-revision pages only.
- **General Aptitude:** 10 questions (5x1 + 5x2 = 15 marks) every day - the GA book's appendix holds all 170 GA questions with answers.

Known limitations, stated plainly: (1) Figures, tables and circuit diagrams are not redrawn - each affected question says so and points to the source page. (2) 2017 and 2020 are image-only scans; their text was OCR-recovered and flagged, so verify unusual symbols. (3) Pre-2016 papers (1991-2015) are not in the supplied repository and are therefore absent - send them and they can be added the same way. (4) Subject tagging is keyword-based with a manual pass; if a question sits in a neighbouring book, it is still present exactly once across the set (audit CSV has the full mapping).
